

Dr. Irene Panderi is a Professor of Pharmaceutical Analysis and Director of the Laboratory of Pharmaceutical Analysis at the Faculty of Pharmacy, National and Kapodistrian University of Athens. She is a licensed Pharmacist and holds a PhD in Pharmaceutical Analysis. She worked for five years as a hospital pharmacist at Sotiria General Hospital in Athens, Greece. She has also completed sabbatical training in Proteomics at Uppsala University, Sweden (2007), and in Mass Spectrometry Imaging (MALDI-TOF/MS) at Brown University Medical School, Providence, RI, USA (2012–2013). Her research focuses on the development of novel analytical methods for the detection and quantification of drugs, metabolites, bioactive compounds, and chemical constituents in pharmaceuticals, cosmetics, biological fluids, and human tissues. These methods are applied in clinical trials, toxicology studies, doping control, chemical risk assessment, and pharmaceutical quality control. Dr. Panderi teaches both undergraduate and postgraduate courses, including Introduction to Laboratory Practices, Analytical Chemistry II, Pharmaceutical Analysis I and II, Advanced Pharmaceutical Analysis I & II, Bioanalytical Techniques, etc. She is a member of several scientific societies including the American Society of Mass Spectrometry, the Panhellenic Society of Pharmacists, and the Scientific Committee on Consumer Safety (SCCS, EU).
