

Dr. **Eleni V. Mikropoulou** is a graduate of the School of Pharmacy of NKUA (2016), holds an MSc degree in Natural Products Chemistry from the Department of Pharmacy (NKUA, 2017) and a PhD in Pharmacy (2022). For her doctoral studies she received a three-year scholarship from the Stavros Niarchos Foundation. In 2023, she was a member of the winning team of the “Bionorica Phytoneering Award” which recognizes outstanding research in the field of development and application of phytotherapeutic products, and in 2024 she received the Fitoterapia journal’s young scientist award. Her research interests include, among others, the development and application of LC-MS based metabolomic approaches in diverse sample matrices, the development of qualitative and quantitative methodologies for the characterization of complex samples using analytical techniques, as well as the isolation and structure elucidation of natural products with chromatographic and spectroscopic techniques.
